

Title: Petition for Variance from the City of Phoenix for Wall and Pedestrian Gate Structure

Dear Residents,

We are seeking your support by signing this petition to request a variance from the City of Phoenix for our wall height and pedestrian gate-structure located at 1035 E Ocotillo Road. Our property is situated on a heavily trafficked street. Many cars use Ocotillo Road as a cut-through traffic street and travel at **high** speeds. There is no stop sign at the dead end intersection at the corner of 11th street and Ocotillo, which poses a significant safety concern for our family and our property. Additionally, our property is frequently targeted by solicitors, trespassers, and transients. This poses a threat to the safety and security of our family and property.

Our wall and pedestrian gate is vital for the safety of our family, visitors and neighborhood. This provides an additional layer of protection and security for our family and our property. However, due to the safety concerns mentioned above, we require a variance from the City of Phoenix to proceed with the construction.

We kindly request your signature on this petition to show the City of Phoenix that there is significant community support for this variance. Your support would be greatly appreciated.

Thank you.
